

The results are unbelievable but it's true!

May we introduce to you our 2 high-end liquid cleaner for Vinyls and CDs!!!

Elune Level 9- (Strength) and Elune Level 36 (Vintage)

Elune Level 9 is highly recommended for Vinyls although this can be used for CDs as well. When used on Vinyl, very noticeable improvement of sound quality will be achieved.

CDs and Vinyl surfaces have very small dirt and dust that can only be removed by a minimized molecule cleaning agent. It even cleans the very hard to remove dirt which are the grime and some sticky and unwanted chemical residues left out on the grooves for a very long time. And not any Vinyl/CD cleaner in the worldwide market can clean as the same as this product!!!

Aside from the noise from dirt and dust, another amazing thing that this product can do is about the static noise. The noise produced by static will be reduced up to 70 percent because of the coulomb balance that these product performs upon cleaning.!!!

We had series of tests on Vinyls and these are the results of our current tests..aside from the test, japanese customer's feedback is very credible and these are the feedbacks we have received.

A Vinyl with a grading of EX(excellent), after using this product , grading will go up to NM(NearMint)!!! the results are unbelievable but it's true!!!

If you use this on ESOTERIC SACD which is a master level recording /remastering CD, analogue noise can be heard as it was re-mastered from its original master tapes. But after using this product, analogue noise will be reduced and therefore you can listen to a more natural sound on this CD.

Elune Level 36 is a very unique and interesting product for it has only 20-30 size particle.(molecules) This product performs on sound dimension. It will basically change the sound dimension and you can have a new listening experience on your CD or even Vinyl .We often depend on high-end expensive mixers, amplifiers, cables and speakers (though we do not discourage) , but this wonder product can make you think you are listening in a big hall !!! Better would be is to try our two products and you will surely be amazed and satisfied!!!

You will have a great listening experience after using ELUNE!
